Project Documentation: GWA Calculator

Version 5.2 — April 2026
Official Web Link: https://kakapostrigops21-gif.github.io/Grade-calc.kakapo/

1. Project Overview

GWA Calculator is a high-performance, offline-capable computational tool designed for students and academic institutions. It provides grade calculations for Philippine grading systems (Pisay/PSHS, DepEd, Standard) and nine international country grading systems. Built with pure HTML5, CSS3, and vanilla JavaScript.

Platform Availability

Platform	Status	Notes
Web (Hosted)	✅ Fully Functional	https://kakapostrigops21-gif.github.io/Grade-calc.kakapo/
Android (APK)	✅ Available	Native build via Apache Cordova
Windows Desktop	✅ Available	Standalone Electron executable

2. Multi-language Localization System

To support its expansion into international grading systems, the software features a robust multi-language UI system. This allows users to navigate the interface in their native language, improving accessibility and user experience across different regions.

- English (Default)
- Korean (한국어)
- Japanese (日本語)
- German (Deutsch)
- Mandarin Chinese (中文)

3. Core Technical Features

- International Systems: Support for USA, UK, Canada, Japan, South Korea, Australia, Germany, Taiwan, and China.
- Philippine Grading: Specialized modules for Pisay (PSHS), DepEd, and Standard Percentile/GWA modes.
- Dynamic Input Engine: Automatically handles percentages, fractions, and letter-to-numeric conversions.
- Persistent Local Storage: Data management via IndexedDB for web/mobile and local file systems for desktop.
- Cross-Platform Compatibility: Available as a Web App, Android APK, and Windows Executable.
